

## Not just about play, it Works!

The Eee PC rewrote the rules... And the world fell in love.

In November 07, ASUS launched upon an unsuspecting world the Eee PC range, a new generation digital device that provides a comprehensive computing experience in a shockproof and stylish package. The Eee PC range was met with immediate critical and consumer acclaim and has sold over 1 million units worldwide. Crowds flocked to launch event. Online sales exceeded all expectation and the Eee PC became "the most Wanted Christmas Gift" on American Amazon.com and Cnet.

The ASUS Eee PC has fans across all demographics, meeting people's mobile computing needs. The range provides a fantastic computing experience that is based on the three Es: Easy to Learn, East to Work and Easy to Play. So whether you are a family wanting to stay in touch with the latest family gossip, a business person desiring the latest news on stocks and shares, or an entertainment lover wanting to stay hot with the latest trends, then get connected the Eee PC way.

The Eee PC is a market leader delivering high performance and portability in a stylish package that looks at home on the catwalk, in the playpen and even in the boardroom. And the magic continues with the launch of the new generation – dubbed the Eee PC 900 – that

comes packed with several stunning updates and improvements. The Eee PC 900 comes with built in SSD which is the truly “mobile” memory delivering a great antishock features, ideal for protecting your data in any environment. The screen size is a compelling 8.9" alongside 1GB of memory and storage of up to 20 GB. And this is all delivered with the weight staying below 1kg, creating an ideal fusion of mobility and computing.

So whether you are at home, on the move, at work or out playing and you want to stay connected then drop an EeePC 900 into your bag and know that you have the perfect tool with which to stay in touch.
